22 August 1967

MEMORANDUM FOR: Chief, Intelligence & Information Processing Division  
Rome Air Development Center  
Griffiss Air Force Base, New York 13400

25X1 ATTENTION :

[REDACTED]  
EMIRA

SUBJECT : Report of NOD 100 Viewer Test

1. The subject report has been reviewed and found to be both impressive and potentially beneficial in aiding NPIC's Rear Projection Viewer development. As members of your organization are aware, NPIC is developing an advanced rear projection viewer at [REDACTED] which is designated the NOD 110. This viewer has off-axis resolution and screen brightness capabilities which will be a significant improvement over the existing NOD 100.

25X1

2. The report on the NOD 100 will aid NPIC to overcome those slight defects that the Air Force found in that instrument and will allow procurement of the NOD 110 viewer more closely configured to the requirements of the intelligence community. Although your report did not specifically detail this area, NPIC intends to direct an effort to investigate the physical configuration of a viewer in relation to the photo-interpretation task. Hopefully, an ideal set of viewing parameters: e.g., viewing angle, will be furnished to Northronics for their use during the design of the instrument.

3. It is NPIC's intention to maintain a close liaison with RADC to insure that all parties are kept aware of the advances in the development of the NOD 110.

[REDACTED]  
Colonel, USAF

Assistant for Technical Development, NPIC
